

Toprak Bilge

BI & Analytics Engineer

turantoprakbilge@gmail.com · +49 157 5284 1577 · Munich, Germany · turantoprakbilge.github.io ·
github.com/turantoprakbilge · linkedin.com/in/ToprakBilge

BI & Analytics Engineer with a data platform engineering foundation (PySpark, Databricks, Delta Lake, Azure Synapse) and a growing specialization in applied AI — from fine-tuning LLMs in a production marketing context to Databricks' Generative AI Engineering track and daily use of AI-assisted engineering tools (Claude Code, GitHub Copilot, Codex). Continuously upskilling through hands-on certification (Databricks Academy, DeepLearning.AI) rather than passive learning, backed by an MSc in Management & Technology from TU Munich (thesis on LLMs in recommendation engines, with Amazon).

PROFESSIONAL EXPERIENCE

Allianz SE, BI & Analytics Engineer (Full Time)

06/2024 – present · Munich, Germany

- Own the financial data warehouse for the central operations team, supporting regulatory reporting across five EU countries (EIOPA, BaFin, and national regulators).
- Design and maintain dimensional data models over 10B+ transactional records, feeding Power BI reporting used by 500+ business users.
- Build and optimize PySpark transformation pipelines on Databricks (Delta Lake) and Azure Synapse to produce governed, report-ready datasets from SAP FI-GL sources.
- Diagnosed and resolved 100+ data-processing incidents, improving pipeline reliability and reporting accuracy.
- Translated business and operational requirements into technical solutions, including enhanced monitoring over data-processing pipelines and defining data-quality (DQ) frameworks around them.
- Lead data governance, error-handling, and data-quality initiatives across the reporting pipeline.
- Act as Data Steward for local and global master data, ensuring consistency across SAP and Azure Synapse systems.
- Deliver technical training and documentation to drive tool adoption among internal stakeholders.

AMAZON, Data Analyst (Working Student)

06/2023 – 06/2024 · Munich, Germany

- Fine-tuned an internal LLM to power automated marketing-campaign generation.
- Automated weekly engagement reporting, reducing manual effort and improving accuracy.
- Ran customer segmentation and A/B tests across 20+ campaigns reaching 3M+ customers.
- Organized and led an international Generative AI workshop at the London HQ.

SIEMENS, Data Scientist (Working Student)

06/2022 – 06/2023 · Munich, Germany

- Built C-level Power BI dashboards supporting multiple manufacturing use cases.
- Deployed NLP document-classification models (Flask, REST API, Docker).
- Built optimization models (PuLP, Gurobi) for resource allocation and operational efficiency.

SabancıDx, Data Scientist (Full Time)

04/2021 – 08/2021 · Istanbul, Turkey

- Built AI-based optimization models that cut client energy consumption by 20%+.
- Delivered ML-driven quality-improvement projects using R, Python (NumPy, Pandas, Matplotlib), and SQL.

Bayer AG, Data Scientist (Senior-Year Academic Project)

09/2020 – 09/2021 · remote / Denver, USA

- Optimized production scheduling and network flow with linear programming and simulation, reducing cycle time by 35% and cost by 15%.

EDUCATION

MSc Management and Technology — Technical University of Munich (TUM)

10/2021 – 02/2024 · Munich

Thesis: Potential of LLMs in B2C Recommendation Engines — in collaboration with Amazon · GPA: 1.5 (German system)

BSc Software Engineering (Double Degree) — Bilkent University · GPA: 3.56 / 4.0

01/2019 – 01/2021 · Ankara

BSc Industrial Engineering — Bilkent University · GPA: 3.32 / 4.0

01/2017 – 01/2021 · Ankara

SKILLS

Languages & Query: Python, SQL, R
Data Engineering & Big Data: PySpark, Databricks, Delta Lake, ETL/ELT, Spark
Cloud & Data Platforms: Azure (Synapse), AWS, SAP FI-GL
Data Modeling & BI: Dimensional modeling, Power BI (DAX), Tableau, master-data / semantic modeling
ML & AI: scikit-learn, PyTorch, LLMs, RAG, MCP
Tools & Workflow: Git, Docker, REST API, Jira, Excel
AI Coding Tools: Claude Code, GitHub Copilot, Codex, Google Antigravity

CERTIFICATES

- Generative AI with LLMs — DeepLearning.AI
- Neural Networks and Deep Learning — DeepLearning.AI
- Supervised Learning with scikit-learn — DataCamp
- Generative AI Engineering with Databricks — Databricks Academy
- Data Engineering with Databricks — Databricks Academy
- Apache Spark Programming with Databricks — Databricks Academy
